Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner suggested that Claim 59 be amended to more clearly state how the barn is "further modified". Applicant agreed to add language taken primarily from page 9, lines 31-32 of the instant specification, so that the claim states that the barn is modified in such a way as to ensure that the nitric oxide level in the barn during curing of tobacco is suppressed to prevent formation of TSNA's in tobacco, which is neither taught or reasonably suggested in the prior art of record. Such changes to the claims are reflected in the attached Examiner's Amendment .
